

```

    request
    ↓
    result = obj_inst.method(args);
    ↑
    response
  
```

RMI - What's needed (coders view) (RPC):

1. Protocol .

**ArithIface** extends **Remote**

2. Server

**ArithServer** extends **UnicastRemoteObject** implements **ArithIface**

3. Client

**ArithClient**

```
result = obj.method(args)
```
